Its specific design, advanced processing, graphic display and video capabilities meet the evolving and operational needs of modern Armed Forces and cope with the toughest environments.

A3R Technology, based on mechanical and electronic common architecture, generates modular and flexible configurations. It allows selecting screen sizes (17", 19", 20", 21"W, 24" & 24"W), brightness level, processors performance, as well as military specs ruggedization according to random vibrations levels: level I up to 3 G RMS (SK1 serie) and level II up to 6 G RMS (SK2 serie).

Tightly coupled with client hardware and software - control, command, communication (C4I) and sensor systems - open-ended electronic architecture and easy mounting make it the choice of prime system integrators as a reliable, configurable, upgradeable, best cost and lead time MOTS (Military Off The Shelf) equipment in operational use today.

PRODUCT MOUNTING

Basically, the back side of the A3R packaging offers threaded holes for four M8-screws, that can be operable or not. Note that this mounting is invariant whatever the size of display. Customer has to choose between front or rear mounting.

STANDARD FRONT MOUNTING

Standard front mounting is realized by fastening of 4 x M8-captive screws positioned at each front corner of the product, finished with trim screws (example for 6821SX-FHD).

FRONT MOUNTING

OPTIONNAL REAR MOUNTING

Optionnal rear mounting can be realized by using the 4 threaded holes for M8-screws positioned at each rear corner of the product (example for 6821SX-RHD).
